Function	Image	Description
F01 Passage		Latch bolt operated by handle from either side at all time.
F04 Entry		Latch bolt operated by handle from either side. Outside handle is inoperable when applying locking toggle to lock. Latch bolt retracted by handle from inside or by key from outside. Auxilliary latch deadlocks latchbolt when door is closed.
F05 Classroom		Latch bolt operated by handle from either side unless outside is locked by key. When outside handle is locked, latch bolt retracted by key from outside or by handle from inside. Inside handle is always free for immediate exit. Auxiliary latch deadlocks latch bolt when door is locked.
F07 Storeroom		Latch bolt operated by key from outside or by handle from inside. Outside handle is always inoperable. Inside handle is always free for immediate exit. Auxiliary latch deadlocks latch bolt when door is locked.
F15 Hotel		Latch bolt operated by key from outside or by handle from inside. Outside handle is always inoperative. Deadbolt operated by thumbturn from inside which shuts out all keys except emergency key. Inside lever will retract both bolts (simultaneous retraction).
F20 Entrance Department Office		Latch bolt operated by handle from either side, deadbolt retracted by key from outside or thumbturn from inside. When deadbolt is thrown or locking by locking toggle, outside handle is inoperable. Latch bolt can be retracted by key from outside. Auxiliary latch deadlocks latchbolt when door is closed.
